GREETINGS

Dear Dina,

Greetings and welcome to the inaugural issue of *Form & Function: the Email Newsletter from EP Engineering!*

The launch of our newsletter coincides with many exciting changes happening here at our company. We're expanding, we're innovating, and we've even moved locations. All this, with a mind to continue providing our customers with the highest level of customer service and satisfaction. Some highlights:

New Address - Now it's easier than ever to reach the professionals at EP Engineering

New Website - Because communication is critical to your success

New Faces - We're thrilled to welcome two new members to our growing staff!

If you like what you read here, feel free to forward to a colleague. We look forward to collaborating with you on future projects and keeping you updated with industry news and developments.

Sincerely, The Design Team at EP Engineering

ENGINEERING SERVICES

EP Engineering provides a full spectrum of mechanical engineering, electrical and plumbing design services for [commercial](#), [residential](#), [retail](#), [cultural](#), and [institutional](#) facilities throughout the Northeast United States. For more information, please visit the [solutions](#) page of our website.

DEVELOPMENTS

Movers and Shakers

We've just completed the move to our new headquarters in downtown Jersey City, New Jersey. The office of EP Engineering is now conveniently located just 4 blocks from the Grove Street PATH train and only 15 minutes to lower Manhattan. Stop in and see us if you're in the area! Also, don't forget to make a note of our new mailing address:

EP Engineering, LLC.
336 Second Street
Jersey City, NJ 07302

Phone: 201.798.8931 (still the same number as before)

Zooming in on the Details

Did you know that EP Engineering is providing MEP services for all 63 branches of the [Queens Public Libraries](#)?

Get a feel for the types of MEP projects we can handle for your company at our newly designed website, still located at <http://epengineer.com>. Same URL, new, cleaner look and great information! At EP Engineering, we take great pride in offering you exceptional quality service. We feel that the new logo and sleeker design of our new website better reflects our values of first-rate customer service and practical, cost effective engineering design solutions.

ON THE HORIZON

Green Building

EP Engineering is expanding to the area of LEED (Leadership in Energy & Environmental Design). We are anticipating accreditation in this area and hold an active membership with the US Green Building Council. We currently offer energy & cost saving solutions like efficient air handling systems, optimized energy performance and water use reduction for clients who express interest in preserving the environment. We look forward to updating you on our first LEED project very soon!

Wide-Format Printing

We are in the process of developing a new printing facility to assist our clients with wide-format printing, scanning & copying. This will allow us to handle a higher capacity of printing jobs and offer you additional services including color copying and report production. Currently, the logistics of this facility are being worked out. If all goes as planned, you'll be able to submit your files for printing and delivery and let us take care of the rest. Stay tuned for more information on printing services from EP Engineering!

BEHIND THE SCENES

Welcome Aboard

A big WELCOME ABOARD to our new employees, Jimmy and Basil. Jimmy W.A. Smith, senior electrical engineer, has been with EP Engineering since May. Basil Pizzuto, CAD manager and designer, joined us in July. Having them around is a big boost to production and each is a welcome addition to the EP Engineering staff.

Thanks and Kudos

Thus far, the majority of our engineering projects has come from word-of-mouth recommendations. We'd like to send a big THANK YOU to our clients for passing our good name along. We are really proud of the relationships we have built with many of you, and it shows when you recommend us to new clients. That's pretty much the biggest compliment you can pay us!
